New member tips: Inventory Reporting

by Jerry Cassidy

The Angus Herd Improvement Records program (AHIR®) is primarily based on submitting data on individual calves born within a calf crop. A different mindset is to report all the cows in your program by identifying your cow inventory, then reporting information from their subsequent calves or provide a reason if there is no resulting calf.

Reporting on a per-cow basis compared to a per-calf basis can add validity to the database and give insight to those economically relevant traits that are difficult to characterize, such as fertility and longevity. Inventory reporting also requires producers to submit cow disposal codes and reason designations to keep accurate records of when and why a cow was culled.

Q: When is the best time to enroll?

A: The most effective time to enroll your herd is after your current calf crop is weaned and before your next calf crop has started calving. Therefore, if your herd is mainly a spring-calving herd, it is best to enroll your herd from November to Jan. 15. If you are primarily a fall-calving herd, it is best to enroll your herd from May to July 15.

Q: If I do not enroll in Inventory Reporting, can I still submit AHIR data?

A: Yes, you can still submit AHIR information as you have historically. There are now two options for AHIR reporting: Individual Reporting and Inventory Reporting.
