## Into the Future

*Cattle equipment progresses to match the needs of producers.*

### Arrowquip 700 Series

Arrowquip introduced their 700 Series to the public on July 13, labeling it the start of a new era of cattle handling equipment. With several new features, this series is designed to meet the needs of the American cattleman.

“Arrowquip’s 700 Series takes cattle handling to the next level with advancements like you’ve never seen before to provide ranchers with an even easier, quieter and more efficient cattle handling experience,” the company says.

With the new series of products come the Q-Catch 87 Series and Q-Power 107 cattle chutes.

The 87 Series is labeled as the “world’s quietest manual cattle chute.” Each feature on the chute is designed with purpose and precision, and is named for the 87 quiet points on the product.

The Q-Power 107 Series is a silent hydraulic chute offering the perfect balance of efficient power, and is a combination of “strength and grace.”

The company designed the series with ease of use in mind. They proudly say this new equipment is entirely portable.

“With over 37 model configurations to choose from, you have all the options you need to find a system that works for you,”

Arrowquip staff said. “The patented portable system frame makes folding and unfolding the tub easier than ever before.”

Features such as easy entry and exit, an easy-flow alley, and a collapsible

tub are capable of being set up or torn down for transport quickly and efficiently.

With a standard warranty of seven years for manual chutes and lifetime warranty on the rubber floor, friction locks and rump fingers, Arrowquip assures customers their newly purchased chutes will last.

These series and products are officially available with Arrowquip dealers across North America. For more information, contact 866-383-7827 or [sales@arrowquip.com](mailto:sales@arrowquip.com).
