

# ANGUS ALMANAC

Compiled by Heather Lassen, special projects editor

*This almanac is presented as a listing of Angus sales and events known to our staff. Sales are presented by sale date, herd/association name and herd location (also sale location, if different). If more than one herd is involved, the address listed is location of sale. To make this listing concise, we have used the following abbreviations: associates, assoc.; association, ass'n; beef cattle improvement association, BCIA; beef cattle improvement program, BCIP; brothers, bros.; company, co.; enterprises, ent.; international, int'l; junior, jr.; mountain, mtn.; national, nat'l; northeast, NE; northwest, NW; performance-tested, PT; Roll of Victory, ROV; senior, sr.; southeast, SE; southwest, SW; to be announced, TBA; and university, Un. (The most current Almanac listing is online, available at [www.angusjournal.com/aj\\_calendar.html](http://www.angusjournal.com/aj_calendar.html). This version is updated on a regular basis and is searchable by keyword, location and date.)*

# NEWSMAKERS

Compiled by Lindsay King, assistant editor

*Within this “Newsmakers” column we are pleased to share important news and accomplishments of our members, including state association activities, birth and marriage announcements, and news of Angus members’ passing.*

## Chris Stallo promoted to chief operating officer

The American Angus Association announces the promotion of Chris Stallo to chief operating officer. He officially

started the position on Sept. 10 after previously serving as the vice president of operations.

“I’m very pleased to promote Chris to the role of chief operating officer,” says Allen Moczygemba, American Angus Association CEO. “He’s spent more than 20 years working intimately with the Association’s programs and services and has an unmatched understanding of the workings of the Association and how we serve membership. I couldn’t be more excited to work with Chris as the Association’s COO.”

Stallo first started at the Association in 1997 in a consulting role for the Information Systems department, then came aboard full time in 2000. In 2008, he was promoted to assistant director of information systems after assisting with the development of the Association’s first member login area,

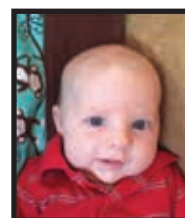

AAA Login, which is now responsible for almost 60% of all registrations submitted to the Association. Then, in 2014, he was promoted to vice president of operations, a role he was in for four years.

“Ensuring the Association and its membership stays on the front end of technology has always been important to me,” Stallo says. “I’m honored to continue my work with the Association and its entities as we look to pioneer more progress for the Angus breed.”

Stallo has been part of a team that has provided Association members with an ever-growing technology suite for more than 20 years. He has been involved with running company-wide operational functions and leading large-scale projects from inception to successful completion, the most recent of those being the new Association feeder cattle program, Angus Link<sup>SM</sup>.

The Missouri native graduated from DeVry University in 1994 with a Bachelor of Science in computer information systems. He grew up on a commercial cattle operation near Marceline, Mo., where his parents continue to run nearly 250 head of commercial cattle today. Stallo and his wife Suzanne have three sons – Noah, Alex and Ryan – and they are all highly active in their Platte City, Mo., community.

## Angus Arrivals

Andrew and Landi McFarland-Livingston, Ellston, Iowa, announce the birth of their son Ty Kyle on July 17. He weighed 7

pounds, 14 ounces and was 21 inches long. Andrew and Landi operate Hoover Angus with Landi’s parents David and Joy McFarland and her grandfather John Kiburz.

## Recognition

Cliff Lamb, animal science department head at Texas A&M University, received the 2018 American Society of Animal Science (ASAS) Animal Physiology and Endocrinology Award at the ASAS annual meeting in Vancouver, Canada, this past July.

This award recognizes an individual who has contributed to and published outstanding work in livestock species. Specifically those for the synthesis of arginine, polyamines and glycine that are critical to the development and function of the small intestine, vascular system and placenta.

Since the fall of 2013, Lamb has shared his reproductive expertise with producers through the Repro Tracks column in the *Angus Journal*.
