

Angus Foundation Awards Young Commercial Cattlemen Scholarships

Scholarship program supports students using Angus genetics in commercial operations.

by Peyton Schmitt, American Angus Association

The Angus Foundation recently awarded the Commercial Cattlemen Scholarship to four outstanding youth in the beef industry. This scholarship is unique from others offered by the Angus Foundation as it aims to support students outside of the seedstock industry. To apply, youth and/or their parents/guardians must use Angus genetics in their breeding program.

Winning a 2022 Commercial Cattlemen Scholarship are Kaitlyn Heaton, Spanish Fork, Utah, Utah State University; Tucker Huseman, Ellsworth, Kan., West Texas A&M University; Michaela Keller, Valentine, Neb., Eastern

Wyoming College; and Abigail Mosley, Hartville, Mo., Truman State University.

“We’re excited to recognize these four young leaders in the beef industry,” says Jaclyn Upperman, executive director of the Angus Foundation. “We understand the value of young commercial cattlemen who utilize Angus genetics, and we’re happy to support them in furthering their education.”

Young men and women utilizing Angus sires and dams in their commercial operations are eligible to receive the scholarship. The students should be pursuing an undergraduate degree or vocational program at

an accredited institution of higher education.

Applications are reviewed by the Angus Foundation’s scholarship selection committee, composed of two Angus Foundation representatives, two Angus industry representatives and one beef cattle industry leader. Emphasis is placed on the applicant’s knowledge of the cattle industry and their perspective of the Angus breed. [A](#)

Editor’s note: For more information on the Commercial Cattlemen Scholarship, visit AngusFoundation.org. Applications for the next scholarship cycle will be due May 1, 2023.
