

# Association Sees Growth in 2002

The American Angus Association releases its report on business for fiscal year 2002.

by Susan Rhode

The American Angus Association's fiscal year (FY), which ended Sept. 30, showed growth in all major areas of business for 2002, including its entities Angus Productions Inc. (API) and Certified Angus Beef LLC (CAB). Registrations of Angus cattle totaled 281,965, and CAB estimates that 540 million pounds (lb.) of fresh and value-added products were sold.

"We couldn't be more pleased with the year-end statistics for this organization," says John Crouch, executive vice president of the Association. "Considering the tough year cattle producers have had across the United States, we consider these levels of growth a tremendous vote of confidence in Association services and the genetics our members are offering to commercial producers."

The 281,965 registrations represented an increase of nearly 4% for the year. Transfers for the same period, which represent sales of cattle to new owners, were 164,603, a 3.5% increase from FY 2001.

Sales of Angus cattle for the year were steady or up in all areas. Reported figures include a total of 553 Angus sales, including consignment, production and dispersal sales, which were attended by regional managers representing the Association. Average prices were \$2,474 per head for females and \$2,358 per head for bulls, with a total average for all lots of \$2,402.

A total of 2,663 new regular members joined the Association during the year, an increase of 3% from FY 2001. New junior memberships for the year totaled 1,450.

For the third year in a row, sales of *Certified Angus Beef*<sup>®</sup> (CAB<sup>®</sup>) products passed the half-billion-pound mark, maintaining the CAB position as the largest breed-specific branded beef program in the world. Of the projected 540 million lb. sold, retail licensees sold a projected 292 million lb., which represents more than half of the total volume for the program, while foodservice licensees sold a projected 167 million lb. International licensees contributed a projected 70 million lb. to total sales.

"These figures add up to a solid year for our program," says Jim Riemann, CAB president. "But what these figures don't represent is the growth the program has experienced in sales of value-added products, which accounted for nearly 12 million

pounds of total sales, an increase of 25% from fiscal 2001."

More than 12 million head of cattle were visually identified as being eligible for CAB. Of those cattle, 2.1 million head met CAB product specifications for a 17.1% acceptance rate.

Association members continue to build upon the world's largest database of beef cattle performance records by submitting data at record levels. The Performance Programs Department received records from more than 8,000 herds. The total number of records received was up 3.4%, which included 291,320 birth, 283,816 weaning and 141,807 yearling weights.

The use of ultrasound to gather body composition measurements on cattle continued to increase, with records on more than 85,000 animals reported, a 24% increase from FY 2001. These records were submitted by more than 2,000 herds, which reflects a 19% increase in participation.

American Angus Association members continue to realize the advantages of using Angus Information Management Software (AIMS) and online services via the Association's Member Logon Web site to electronically submit data for processing. During the year, more than 95,000 registrations were submitted electronically by members, which accounts for more than one-third of the total work received. More than 44% of total weaning weights and more than 50% of total yearling weights were received electronically.

The American Angus Association is the world's largest beef breed organization. The not-for-profit company along with its wholly owned subsidiaries, CAB and API, and its affiliate, the Angus Foundation, provide programs and services to members; support youth, education and research; and promote the Angus breed. For more information, look for the Association Annual Report inserted in this issue, call (816) 383-5100 or go to [www.angus.org](http://www.angus.org).
