

Angus Offers Summer Internships

Hands-on internship opportunities are available to college students.

Compiled by Julie Mais, editor

The American Angus Association offers opportunities for college students to further their education and gain experience with the world's leading beef cattle association. Paid summer internships offer goal-oriented students an opportunity to build upon writing, editing, photography and organizational abilities while developing knowledge of agriculture and the beef industry.

The internships being offered include:

Angus Media

This writing-intensive opportunity offers the chance to participate in producing print and digital publications, including the *Angus Journal*, *Angus Beef Bulletin*[®], *Angus Beef Bulletin EXTRA*, *AJ Daily*, and content for social media channels and podcasts. The internship can be tailored to the intern's interests, but many duties can be anticipated, including traveling to industry events. Experience in news and feature writing, editing, and photography is strongly suggested.

Communications

From print stories to video scripts, photography, graphic design and more, the intern will gain valuable ag communications experience. Applicants should have strong writing and design skills and

completed coursework in news and feature writing, editing, and design. Experience in photography, video and social media would be helpful.

Events and Junior Activities

The intern will assist in planning and executing youth events hosted by the National Junior Angus Association (NJAA), including preparations, correspondence and coordination for junior shows and events. Applicants should be self-starters, detail-oriented and outgoing, with the ability to work well with others. Livestock and event planning experience is a plus. Travel to the 2023 National Junior Angus Show (NJAS), Leaders Engaged in Angus Development (LEAD) Conference and other events is expected.

Angus Genetics Inc. (AGI)

Students pursuing their master's degree or doctorate in animal breeding and genetics should apply for the AGI summer internship. The intern will have the opportunity to work with one of the world's largest beef genomic databases. The internship will be focused on research involving data analysis, so candidates should have experience in analyzing animal breeding data sets and genomic data.

How to apply

Students who wish to apply for an internship should upload their résumé, cover letter and references to the career center at www.angus.org/careers by Jan. 10, 2023. Visit www.angus.org/careers for full descriptions and requirements.
