## 98th Beef Bull Evaluation Test Dean Lee Research Station, Alexandria, LA On-test report (June 5)

Louisiana State University's (LSU's) 98th Beef Bull Evaluation Test began June 5 with 61 bulls representing nine producers. The cattle are being group-fed in 10 pens. Weights will be taken at 28-day intervals for the 112-day test.

Twenty-one Angus bulls started the test at an average age of 236 days, weighing on average 690 lb. for an average weight per day of age (WDA) of 2.94 lb. In comparison, 20 Charolais bulls averaged 239 days of age and 728 lb. for an average WDA of 3.05 lb. The 20 Hereford bulls averaged 202 days of age and 603 lb., for an average WDA of 2.99 lb. Danny Coombs, professor and test coordinator, says the bulls have adjusted well.

If you would like to receive the 28-day progress reports by e-mail, contact Coombs at 318-473-6528 or [dcoombs@agcenter.lsu.edu](mailto:dcoombs@agcenter.lsu.edu).
