

ANGUS WEB SITES OFFER INFO

The American Angus Association, Angus Productions Inc. (API) and Certified Angus Beef LLC (CAB) have a variety of Web sites to provide information to members. If you haven't checked them out, do so the next time you're online.

ASSOCIATION SITES

www.angus.org — This is the Association's flagship Web site and the place to go for information on programs and services, member and industry links, or how to contact the Association and its staff.

www.angusonline.org — This site is your passport to AAA Login, where you can submit registrations and Angus Herd Improvement Records (AHIR) data, pay your balance, purchase and transfer artificial insemination (AI) certificates, and view your registered herd inventory.

www.angusfoundation.org — Learn about projects supported by the Angus Foundation.

www.njaa.info — This site is the official Web site of the National Junior Angus Association (NJAA). You'll find information about upcoming junior activities, downloadable scholarship forms and more. You can enter junior shows online through this site.

www.beefrecords.com — This site is where producers can learn more about the Beef Record Service (BRS), obtain print enrollment forms to begin the program and submit cow herd information online if desired. When enrolled, customers can also go to this site to view and sort their cow herds' data.

www.angussource.com — This is an interactive site for buyers and sellers of Angus-influenced commercial cattle enrolled in the AngusSource program. Listings are for feeder cattle, replacement heifers and bred females, and include information such as weight, health/management information and genetics. Producers can enroll cattle by purchasing ear tags through this site.

www.angusbbs.com — The Bull Listing Service (BLS) allows seedstock producers to advertise their bulls to the world. Users can search by region, expected progeny differences (EPDs) and preferred sire lines to match their specifications.

www.angussiresearch.com — This site offers an electronic, searchable version of the Angus Sire Evaluation Report. Breeders can search the most recent expected progeny differences (EPDs).

www.angus.org/auxiliary — This is the official Web site of the American Angus Auxiliary. Obtain an Auxiliary scholarship application, find contact information for officers and committees, review the Auxiliary's by-laws, learn about fund-raising activities, and access a membership application.

www.angus.org/links — Through this site you can readily access Web sites of regional and state associations, junior associations, members, and industry and international associations.

API SITES

www.angusjournal.com — This is the official Web site of the Association's award-winning publication, the *Angus Journal*. Features allow you to search past issues, browse online sale books and read the most current editorial content.

www.angusbeefbulletin.com — This site is dedicated to the Association's publication specifically for commercial producers, the *Angus Beef Bulletin*.

www.4cattlemen.com — API provides real-time coverage of the Cattle Industry Annual Convention and Trade Show and posts information presented at the convention.

www.angusmanac.com — This site is dedicated to listing Angus breeders' sale dates, state association field days, and other Angus shows and events scheduled across the country. Browsers may sort the listings by location and date.

www.anguseclassifieds.com — With the click of a mouse, browsers can find Angus seedstock, commercial cattle, equipment, hay, embryos and semen. This site offers online posting of items or services and allows Angus breeders to view what others have for sale.

www.anguselist.com — The Angus e-List is a compilation of Angus industry news, information about "hot topics" in the beef industry, and updates about upcoming shows, sales and events.

www.angusinternational.info — This Web site is intended to be a platform for global information sharing within the Angus family worldwide. There's a lot to learn about Angus herds and events in other countries, as well as marketing seedstock abroad. This site may provide a link to such information.

www.angusphotos.com — This site is designed to help producers obtain photo scans to develop promotional items for their Angus farm or ranch, for educational purposes or to promote the breed. The Angus Scans page allows you to search for photos of Angus bulls and females using the registration number or the animal's name. The Show Photos section allows exhibitors to view photos of their winning entries from the Angus super-point Roll of Victory (ROV) shows and the National Junior Angus Show (NJAS).

www.angusproductions.com — This is the flagship site for API. It provides a description of API's departments and services and lists staff contacts.

www.beefcovefficiency.com — Beef cow efficiency is perhaps the greatest single factor affecting your profitability as a beef producer. This site is intended to serve as a gateway to information you might find useful in improving the efficiency of your ranch.

www.bifconference.com — This site provides real-time coverage of the Beef Improvement Federation (BIF) annual meeting. Topics discussed at the conference are displayed online through symposium papers, newsroom articles and other informational postings. Listen to audios of presentations and view archives from previous conferences.

www.angusjournal.com/drought — This site provides a resource for producers across the country who are affected by drought. This comprehensive site was developed as a service to breeders to provide a one-stop site for information on how to deal with drought.

www.countryoforiginlabeling.info — This site offers information about the controversial issue of country-of-origin labeling (often referred to as COOL or COL).

www.rangebeefcow.com — This site provides real-time coverage of the 2003 Range Beef Cow Symposium. Synopses and other copy is being provided by the *Angus Journal* and *Angus Beef Bulletin* editorial staff. Go to the "News : Papers : Audio" page for synopses, audio archives and proceeding papers.

www.nationalconference.com — This site provides a schedule and meeting details for the 2004 National Angus Conference and Tour. During the conference, API staff will provide real-time coverage, including synopses, proceedings papers and audio archives of presentations. An archive of coverage of past conferences is available through this site.

www.angusjournal.com/shows.html — This API Web site features results of junior and open shows, including state preview shows and state fairs reported by the American Angus Association.

www.angusproductions.com/api_salering.html — Sale Ring is a searchable listing of Angus sales reported to API staff. Sales are presented by sale date, sale name and location.

CAB SITES

www.cabfeedlots.com — Here you'll find information from CAB's Supply Development Division, including the most up-to-date list of feedlot partners participating in CAB's Feedlot-Licensing Program (FLP). You'll also find information about the National Angus Carcass Challenge (NACC) and links to producer-oriented information regarding the CAB program.

www.2eatcab.com — A site designed for the consumer, it includes information about the latest *Certified Angus Beef*® (CAB®) brand products, nutrition information and delicious recipes. It's also where you'll find the "Flavor Finder" to locate a licensed CAB restaurant or retail store in your area.
