► Introducing products, services for cattlemen

New nutritional product for feedlot cattle

Agri-King Inc. has introduced Maximiser™ for feedlot cattle, developed specifically to enhance average daily gain (ADG) and feed conversions.

It has two primary components. First, it contains enzymes to enhance the digestion of fiber contained in corn-, soybean meal- and distillers' grains-based diets. Second, it contains a proprietary blend of direct-fed microbials and trace nutrients that support the efficiency of ruminal digestion, according to the release.

For more information visit www.agriking.com or call 1-800-435-9560.

New scraper for snow and more

Westendorf Manufacturing has introduced the Snow Scraper, a durable snow pusher. In addition to snow, the new scraper is also useful for clearing feedlots of manure, parking lots of muck from flooding, pushing grain piles and much more.

The blade is smooth and rib-free so material does not stick to the surface, and it is curved to roll material forward into a large heap to move more material longer distances without leaving windrows.

The scraper is skid-steer and loader compatible, and is available in 8-foot (ft.), 10-ft. and 12-ft. sizes with capacities of 46 cubic (cu.) ft., 58 cu. ft. and 80 cu. ft. of struck capacity, though they can push double that amount in front of the implement.

New viral and *Lepto hardjo-bovis* prevention in one vaccine

Pfizer Animal Health has introduced Bovi-Sheld Gold® HB, a vaccine that combines five-way viral protection with the prevention of *Lepto hardjo-bovis*, the most prevalent strain of leptospira in U.S. cow herds. The new vaccine provides protection against infectious bovine rhinotracheitis (IBR), parainfluenza-3 virus (PI₃), bovine respiratory syncytial virus (BRSV) and bovine viral diarrhea (BVD) Types 1 and 2 combined with the prevention of infection label claim for *Lepto hardjo-bovis* for at least 365 days of immunity. The vaccine can be administered intramuscularly or subcutaneously.

features are a treated wood floor, a full-swing center gate with slam latch, a curbside door for convenient unloading and a low price point. The livestock trailer features aluminum alloy walls and a one-piece roof. It also benefits from the pierce-and-roll technique

Featherlite uses on the roof rivets to reduce the chance of leaks. For more information about Model 8117, visit Featherlite's page for the trailer at www.fthr.com/gooseneck_livestock-trailer/model8117 or call 1-800-800-1230.

New baler can produce high-density bales using smaller hp tractors

Vermeer has introduced the Rancher 665 baler, designed to produce high-density round bales up to 66 in. in diameter (168 cm), 61 inches (in.) wide (155 cm), using smaller-hp tractors.

Standard features include a five-bar pickup; heavy-duty steel rollers; hardened belt guides; a single hydraulic control to adjust bale density; a separated belt design to reduce potential buildup; a drop'n go bale ejection system; and a single-arm center-pivot, electric-twine-tie system with dual feed.

Optional features include a monitor for real-time hay moisture reporting, a netwrap system that feeds directly to the main belts, a spring-loaded bale ramp, six-ball twine storage and work lights.

Changing dual tractor tires now a one-person job

Westendorf Manufacturing has introduced the Dual Changer Max, an implement that one person can attach to front-end loaders and skid-steer buckets.

The implement lets the loader do all the work. Just transport the dual tire to the tractor, and, once positioned, the unit's adjustable cross piping keeps the tire from wobbling. Tool-free three-way adjustments can be made from the ground.

A telescoping crank moves the tire in or out 16 in., and the heavy-duty tire, with bushing, allows easy rotation of the dual to align holes.

New ATV models

Yamaha Motor Corp. USA has announced its full 2010 model year ATV product line, including 17 ATV models from its Grizzly utility line and Raptor and YFZ sport lines.

The YFZ450X is new to Yamaha's line of top-performing sport ATVs and replaces the original YFZ450. This new trail machine is 46.1 in. wide with optimized suspension, fuel injection, and the company's exclusive cast aluminum-steel hybrid frame. Both the new YFZ450X and YFZ450R feature the powerful five-valve DOHC liquid-cooled single-cylinder 449cc engine and highest sport ATV performance technologies available.

More information on all the company's ATVs can be found at www.yamaha-motor.com.
