► Introducing products, services for cattlemen

## Automatic fence gate

Advanced Injection Mold Manufacturing (Aimmco) has introduced Gate Shut,<sup>®</sup> a spring device that automatically closes a gate without the need for electricity or human intervention.

The device attaches to any tubular gate system to mechanically close the gate every time it is opened, according to the release. The device is installed by bolting the clamp to the gate with the spring correctly positioned with the springarm against the gatepost.

Made of tempered, high-grade spring steel and powder-coated for a smooth finish, the device is available in a range of sizes, from the typical chain-link garden gate to a 16-foot (ft.) farm and ranch gate.

For more information call Aimmco at 360-225-5020.

## New handheld data logger

Osborne Industries Inc. has introduced the ID Logger<sup>™</sup> Model 500 to replace the Model 300 series after 12 years in production.

The handheld logger is used to read all ISO-compliant radio frequency identification (RFID) transponders. Production data can be immediately entered for the identified animal in the barn or feedlot and is automatically shared with PC data management software, according to the release. The new series logger has an ergonomic grip, a choice of interchangeable antennas, an option to include Bluetooth<sup>®</sup> wireless connectivity and an RS232 option.

For more information call 1-800-255-0316 or 785-346-2192, or visit [www.osborne-ind.com](http://www.osborne-ind.com).

## New front mount plows

Agri-Cover Inc. (ACI) has announced the release of new front mounts for its Snowsport<sup>®</sup> HD Utility Plow and All Terrain Plows specifically designed for the 2007-2008 Toyota FJ Cruiser, the 2006-2008

Dixon Speed 36, 42 and 44 zero-turn mowers and the 2007-2008 Yamaha Grizzly 700 all-terrain vehicle (ATV). The plows and included mounts are easy to install and don't require any wiring, lever controls or winches to operate, according to the releases.

The plows are manufactured from corrosion-resistant, hardened, anodized aluminum and are equipped with a 1-inch (in.)-thick rubber cutting edge designed to aggressively plow hard, compacted snow while remaining terrain-friendly.

For more information on any of the new front-mount plows, visit <http://shop.agricover.com> or [www.agricover.com](http://www.agricover.com), or call 1-800-233-4655.

## New nutrigenomic product

Alltech has announced EconomasE,<sup>®</sup> its first product in the science of nutrigenomics. The new product is the result of the use of the company's scientific knowledge of the molecular mechanisms of oxidative stress and intracellular signaling cascades, combined with the science of nutrigenomics and the DNA microarray, or gene chip, to identify beneficial gene expression events in pathways associated with oxidative damage, metabolic stress and macromolecular repair mechanisms.

Using these genes as a framework, the company's scientists created the new product to enable animal nutritionists to significantly reduce the level of increasingly expensive ingredients, such as antioxidant vitamins, added to animal diets without compromising performance, according to the release.

## Multispecies fly larvae control

Novartis Animal Health US Inc. has introduced Environmental Protection Agency

(EPA)-approved Neporex<sup>®</sup> 2SG for multispecies fly larvae control.

The product halts larval growth and prevents adult fly development

for improved farm hygiene, according to the release.

Suggested for use with the other products in the company's fly control program, the new product is sold in a granular formulation that can be applied dry or mixed with water for a liquid spray. The product's mode of action controls the larvae of both susceptible and multiresistant flies, and has little-to-no fly resistance profile, according to the release.

## Options for calf preconditioning

Novartis Animal Health has announced that a number of its products are now options in the Merial SureHealth<sup>®</sup> calf preconditioning program, the only nationwide program that requires veterinarian certification and is backed by a 21-day limited health warranty, according to the release.

Some of the qualifying Novartis vaccines include Vira Shield<sup>®</sup> 6, Vira Shield<sup>®</sup> 6+L5 HB, Arsenal<sup>®</sup> 4.1, and Clostri Shield<sup>®</sup>.

## Small-scale fly control

Bayer Animal Health has announced new, smaller packaging for its Tempo<sup>®</sup> SC Ultra Pest Control Concentrate.

The fifth-generation pyrethroid insecticide is a broad-spectrum tool to control indoor, outdoor and wood-infesting pests in and around livestock premises, according to the release. Effective on more than 60 different pests, the 11.8% beta-cyfluthrin insecticide now comes in a 32 milliliter (mL) bottle and can be used in animal housing, including barns, horse stables and other animal quarters.
