Dear Friends,

Welcome

Welcome to our 2010 Baldy Maker Bull Sale. We feel blessed to offer you bulls that will improve both commercial and seedstock herds.

With the beef market being tight, we would like to share with commercial producers, the advantages of crossbreeding. According to the Circle A Heterosis study, the results of an Angus-Hereford cross predict a \$514 net per cow over a 10-year period. These same baldy females will generate 20% larger herd size due to increased fertility and longevity.

Our program goals are to produce a cow herd that is moderate in frame, functional in foot and udder, maternal, and efficient with the potential to produce a favorable end product. We invite you to come prior to sale day and see our cow herd. We would be glad to help you make a profitable selection for your herd.

Steve and Lori
