Brian or Sue Kenny  
(B) (712) 790-2790 • (S) (712) 660-8584  
Eugene Morris - (712) 830-4820

#### **SALE LOCATION:**

Dunlap Livestock Auction, 701 Hwy. 30 West  
Dunlap, Iowa. Phone (712) 643-5761

#### **MOTEL ACCOMMODATIONS:**

Days Inn, Denison (712) 263-2500  
Super 8, Denison (712) 263-5081

#### **INSPECTION OF CATTLE:**

Cattle will be available for inspection at sale site Tuesday,  
March 22.

**TERMS:** Cash. Please settle for cattle promptly.

**TERMS AND CONDITIONS:** All cattle sell according to  
Terms and Conditions of the American Angus Association.

**SEMEN EVALUATION:** Bulls are fertility checked and sell as  
guaranteed breeders.

**FIRST BREEDING SEASON GUARANTEE:** All bulls are  
guaranteed against breeding injury for the first breeding  
season. Breeding season is defined as the 90 day period  
following the first turnout of the bulls. If a replacement bull  
is available, he will be provided; or if the buyer prefers, credit  
toward a bull will be given the following year, less salvage  
value of the injured bull.

**HEALTH:** All Bulls tested for PI-BVD prior to on test delivery.  
All cattle selling are free of AM, NH, CA by test or pedigree.  
All bulls received a complete regiment of weaning vaccina-  
tions. They were poured and wormed twice, the last one  
in January. Interstate health papers will be furnished on all  
bulls selling.

**DELIVERY:** We will offer free delivery on bulls purchased for  
\$2,000 or more within 150 miles of the auction. Beyond that  
distance will be a minimal fee. Delivery will be as soon as  
possible after the sale.

**BULL BOARDING AVAILABLE:** Contact one of the owners  
for information.

**REVENUE SHARING:** Some of the bulls may be sold with  
a semen revenue sharing interest. Buyer will have 100%  
possession and full salvage value. Terms will be noted in sale  
book.

**INSURANCE:** Livestock mortality insurance will be available  
sale day.

**LIABILITY:** All Persons who attend this sale do so at their  
own risk, legal or otherwise, for their safety or for the behav-  
ior of the animals. The owners and staff assume no liability  
for property loss or any accident that may occur.

**ANNOUNCEMENTS:** From the block will take precedence  
over the sale book. Buyers unable to attend may send their  
bids to Dunlap Auction, Field Representatives or Auctioneer.

**LUNCH:** Will be available sale day.

**Online Bidding Available  
at [www.LMAAuctions.com](http://www.LMAAuctions.com)**

To register to bid, go to [www.lmaauctions.com](http://www.lmaauctions.com)  
You must register at least three business days  
before the sale, you must provide a bank  
reference in order to bid.

**Please bring this sale book  
with you sale day!**

Visit the *Angus Journal*® Website,  
[www.angusjournal.com](http://www.angusjournal.com),  
and view this sale book online.

 Cell (712) 304-0699  
 emwied@gliddenwildblue.com

Fellow Cattlemen and Cattlewomen,

On behalf of Kenny Angus, Morris Angus, and Wiederstein Pure Angus I would like to thank you for your interest in our bulls to be sold March 23, 2011 at Dunlap, Iowa. The bulls were developed in one location on a ration to express their phenotypic potential. This is a solid set of bulls but with all groups of bulls there are some outstanding individuals within the group. There are some SAV Pioneer sons that are very stout, there are some outstanding Ambush 28 sons that are thick, there is a flush of Net Worth 4200 sons out of the dam of Select Sires B/R New Day 454 that are powerful and scanned exceptionally well, and a son of 5050 and B/R Ambush 28-780 that scanned an IMF ratio that puts them in the top 1% of the non-parent bulls.

There should be a bull to satisfy whatever your needs may be. Study the sale book and don't hesitate to call about the bulls.

Finally, we may have different names, but we have one thing in common and that is a deep passion to provide the best Angus genetics possible. Thank you for your interest.

Sincerely  
 Ed Wiederstein

High \$B genetics here. Top 1% of the breed for \$B, top 2% for Weaning and Yearling EPDs. A full sister, MA Forever Lady 722T, was the 4th highest \$B female in the entire breed on the fall 2008 EPD report, and was a \$30,000 selection by Southern Cattle Co. in Florida where she is a featured donor. Other full sibs have gone to Basin Angus in Hobson, Montana. Lots 33 and 41 are flush brothers. Selling full possession and one-half semen interest.

29

## MA Blackcap 006X

Birth Date: 2-3-2010 Bull +16803591 Tattoo: 006X

A very good-performing Reflection son out of a WK Wacker daughter that is highly consistent in her performance.

# American Angus Association Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## PRODUCTION

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## CARCASS

**Carcass Weight EPD (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## MATERNAL

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD contributes to \$QG.

**Yield Grade (\$YG)** represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
