

SCHREIBER ANGUS

Annual Spring Production Sale

Tuesday • **March 10, 2020** • 1 PM

At the Ranch near Beaver, Kansas

SA Cowboy Up 8116 - Lot 1

SA Fortright 8202 - Lot 8

SA Chaps 8125 - Lot 19

SA Infinity 8275 - Lot 25

SELLING

- **48 Two-Year-Olds**
- **25 Yearlings**
- **15 18-Month-Olds**
- **Replacement Heifers, Commercial Black Angus and F1 Heifer Pairs**

Fellow Cattlemen,

The Schreiber Angus family would like to invite you to our 8th Annual Production Sale. It seems like time flies, and just like last year's sale was just yesterday; however, we sure are thankful that we are all here and able to do this for another year. We look forward to seeing our customers and friends, along with meeting new customers and getting to know you and more about your operation. We hope you can be with us at the farm on sale day or view the sale on CCI.LIVE. Bulls will sell first followed by a high quality offering of females, including first calf heifer pairs and replacement heifers.

We are a family operation that wants our customers to enjoy the success that designed genetics offer them, and yes, to achieve profit as well as using this profit to make their families, country and world a better place. We believe that good feet, sound udders, and excellent dispositions are just as important as superior EPDs. The bottom end of the bull crop become steers here and no bulls are sold prior to auction day so they have not been picked over. Bulls are freeze branded for easy identification.

What a great place to choose some superior genetics to upgrade any herd for the foundation of a new Angus breeding program. Both proven sires and new and exciting bloodlines will offer something for everyone. It is our goal to have these bulls remain sound, problem-free and to become long-term genetic contributors to the herds that they go into. Schreiber Angus does not practice single trait selections, as we aim to produce a "total product." These bulls have battled with Mother Nature this season, however, continue to impress us every day on their gains. We have worked hard to build a bull lineup that can add value to any herd, sourcing bulls from top seed stock producers around the country. We're confident in these sires, and look forward to adding more bulls to our program that positively influence the genetics of the cattle we love to raise.

Don't hesitate to call with any questions you might have about the genetics we're offering. This is both a social and genetic event you don't want to miss in 2020. Hope to see you March 10th!

The Schreibers
Rick, Jane, Aaron, Paul, Melanie, Joel, Callie, & Abbie

GENERAL SALE INFORMATION

Annual Spring Production Sale

Tuesday • **March 10, 2020** • 1 PM

At the Ranch near Beaver, Kansas

AUCTIONEER

Dustin N. Layton 405-464-2455

REPRESENTATIVES

Jeff Mafi, American Angus Association 816-344-4266

Chisolm Kinder, Oklahoma Cowman 405-747-4683

Jason Schneider, Auction Service 785-650-2433

Andrew Marston, Kansas Stockman 785-250-4440

Animals will be on site and available for viewing . . . Auction will be broadcast via CCI this year for those unable to attend.

ACCOMMODATIONS

Hoisington and Russell have nice hotels not far from the ranch.

Rodeway Inn & Suites, Hoisington, KS (620) 292-6022

Fossil Creek Hotel, Russell, KS (785) 483-4200

HEALTH PROGRAM

The Bulls have been semen checked, wormed with Safe-guard Drench, poured with Clean-up, and have been given a shot of Bovishield Gold. They have been PI (Persistant Infection) & trich tested and found negative. The Bulls have been tested and are guaranteed to be free of all genetic defects known at the present time through the Angus Association. Heifers have been calthood vaccinated. Vet work performed by Russell Veterinary Service; Dr. Dane Anspaugh.

DELIVERY

We offer free delivery within 250 miles of Schreiber Angus on purchases of \$5,000 or more. If you haul your own the week of the sale we will deduct \$50 per bull from your purchase price. Bulls can be taken care of here at our ranch free of charge up to April 10th. We will start delivering bulls around the 1st of April unless you need them sooner. Free Keep and Free Delivery does not apply to the females in the sale.

SIGHT-UNSEEN SATISFACTION GUARANTEE

Buyers unable to attend the sale may contact any of the listed references for assistance in placing their bids. Bids may be taken on the phone during the sale. All bids are held in confidentiality and purchases are guaranteed to meet your expectations.

LIABILITY

Schreiber Angus does not assume any liability in case of accident on sale day.

OWNERSHIP

Livestock is the property of the buyer as soon as sold. Terms are cash or check. Schreiber Angus will retain 1/3 semen interest in all bulls sold.

FIRST BREEDING GUARANTEE

SA will guarantee all bulls selling for \$3,500 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of said bull. Breeding injury is defined as injury to penis or preputial tear with inability to extend. This guarantee does NOT cover non-breeding injuries resulting from accident or gross negligence. We also reserve the right to a second opinion by a veterinarian of our choice. If a replacement bull is available, he will be provided or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Guarantee ends 8/31/2020.

SUPPLEMENTAL INFORMATION

A supplemental sheet will be available sale day with complete and up-to-date information. Announcements from the auction block take precedence over sale book information.

ANGUS MEDIA

Visit the *Angus Journal* Web site, www.angus.org and view this sale book online. References: *American Angus Association*®, *AHIR*®, *AngusSource*®, *CAB*®, *Pathfinder*®. EPDs current as of February 15, 2020. Updated EPDs can be viewed online at www.angus.org. The American Angus Association does not generate nor endorse \$C numerical ranks (versus percentile rankings) until \$C numerical ranks are officially released.

Gardens Timex P257

Gardens Timex is a bull with modest birth weight that will add volume, capacity, dimension and carcass merit to your calf crop. We have used him in our herd and his offspring have excellent vigor, performance and excel in the feedlots. He will produce long lasting, productive and profitable daughters to improve any herd. On the rail he will deliver carcasses with quality and cutability that are sure to earn you grid premiums. Timex ranks in the top 2% on marbling in the breed and is also a superior settler.

Semen is available through Schreiber Angus.

NOTES

So you can focus
on what's important.

Delivering the right product for a particular set of cattle at the right time to achieve desired health, production and efficiency goals is what we do best. Call us today for a solution specific to your operation.

866-666-7626

ADMAnimalNutrition.com/Beef

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves.

From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

Group Age & Source: Verifies the group age and source of the cattle

Angus-Sired Genetics: Verifies calves are sired by 100% registered Angus bulls

Non-Hormone Treated Cattle: Verifies cattle have never received hormones

NeverEver³: No antibiotics, no hormones, no animal by-products ever

Cattle Care & Handling: Documents proper management, demonstrates quality commitment

Calf Management: Documents preventative health program

Genetic Merit ScorecardSM: Measures the genetic merit of calves for feedlot performance and carcass merit.

**Optional, not part of the PVP claims*

Easy and affordable, our customer service representatives walk you through the process.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.
