Proudly Presents our...

35th Annual Sale

Saturday, March 12, 2011 - 1 P.M.

Delta Sales Yard • Delta, Colorado

The Largest PAP-Tested Registered Angus Bull Sale in Colorado

westerncoloradoangus.org

Western Colorado Angus Association

35th Annual Sale

Saturday, March 12, 2011 • 1 P.M.

Delta Sales Yard • Delta, Colorado

**Selling 115
registered
Angus bulls**

Address:

700 W. 5th St.
Delta, Colorado 81416

Directions:

From Highway 6 & 50, turn west on 5th to sale barn.

Suggested Lodging:

Delta Comfort Inn (970) 874-1000
Sundance Best Western (800) 626-1994
Both motels are in Delta, Colorado.
Mention this sale for a discount.

Food & Refreshments:

Available at the sale.

Insurance:

Available sale day. WCAA suggests you insure your purchases.

Registration and Transfer of Papers:

All bulls in this sale are registered with the American Angus Association. If you would like registration papers, please fill out the form at the office when paying for cattle.

Semen Test and Health:

All bulls in this sale have been Trichomoniasis, BVD, Brucellosis and Tuberculosis tested within 30 days of the sale. All bulls are required to pass a fertility test within 30 days of the sale, and all tests are required to be turned in the day before the sale. All bulls have been PAP tested. All cattle will be accompanied by proper health papers for immediate shipment.

Terms and Conditions:

Cattle will sell under the Terms and Conditions as recommended by the American Angus Association. All payments must be made to Delta Sales Yard.

Auctioneer:

Joe Goggins
Office (406) 245-6447
Home (406) 373-6844

Unable to Attend Bids:

Contact the Auctioneer or Sale Manager - Mike Goscha at (970) 274-3223 to place bids or for more information.

Announcements:

Sale day announcements from the auction block take precedence over printed material in this sale book or other printed material associated with this sale.

Day Sheet:

A supplemental sheet will be at the Registration/ Sign-in table and will include current weights, scrotal measurements (taken within the past 30 days), EPDs and pelvic measurements (if taken).

Officers of the Western Colorado Angus Association:

Mike Ripp, President (970) 874-5127
Bill Moore, Vice President (970) 487-3726
Lorie Spencer, Secretary (970) 872-2394
James Carnahan, Treasurer (970) 625-3480

Free Delivery:

Any buyer purchasing five or more bulls may have their bulls delivered free within a 300-mile radius of Delta, Colorado (see map on following page). Any mileage in excess of 300 miles will be at cost. Delivery will be at cost for any buyer purchasing less than five bulls. If roads do not permit delivery to a ranch, delivery will be made to a central location in your area (sale barn). Please check with the sale manager regarding questions on delivery.

Visit the *Angus Journal* Web site, www.angusjournal.com, and view this sale book online.

EPDs current as of Feb. 3, 2011. Updated EPDs can be viewed online at www.angus.org.

Western Colorado Angus Association

Dear Buyer,

The Western Colorado Angus Association (WCAA) would like to welcome you to its 35th Annual Bull Sale. Thanks to you and the support this sale has received over the last 35 years, the WCAA has grown to be the largest PAP-tested registered bull sale in Colorado.

Not only is the WCAA the largest bull sale in the state, but it also offers the highest quality bulls on the Western Slope. These bulls offer a wide selection of calving-ease, growth, and low PAP scores. The 30 breeders of the WCAA are committed to customer satisfaction and are happy to assist you with any questions you may have.

Along with the service commitment to offer high quality bulls, and customer service, the WCAA is also committed to providing our customers with a high quality sale experience, which is why we continue to hold this sale at the Delta Sales Yard. Dan and Holly Varner and the crew always go above and beyond the call of duty to make this a great sale experience and we know you will be taken care of by their professional and capable staff.

We want to thank you for your continued support of this sale over the last 35 years and spending your day here with us. We look forward to seeing you on March 12th at 1:00 p.m.

Sincerely,

WCAA Sale Committee

Map shows free delivery radius. Notice the radius covers most of Colorado, Utah and a large part of Wyoming and New Mexico. Additional miles over 300 at cost.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Production

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Carcass

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Maternal

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$Value Indexes

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD contributes to \$QG.

Yield Grade (\$YG) represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

PAP Score Evaluation

To accurately use and evaluate PAP score, important factors must be considered. Both buyer and seller must be aware of these factors and understand how they play a role in the PAP program.

Special consideration should be made for those animals tested at or less than 12 months of age. If the animal scores in the 30-35 mmhg range, the test appears to be approximately 90% accurate in predicting the PAP score to remain within an acceptable level for high altitude use. If the animal scores 35-40 mmhg, the accuracy level is approximately 82% for the PAP to remain in the acceptable range for high altitude. Any score above 41 mmhg seems to be questionable to what will happen as these animals age and it is strongly recommended that these animals be retested prior to use.

WCAA SCHOLARSHIP PROGRAM

The Western Colorado Angus Association (WCAA) is offering a \$500 scholarship to a graduating senior from the Western Slope that plans on continuing their studies in the agricultural field.

If you know of a student that would benefit, please contact Jere Hollembeak, (970) 872-3021 for more information.
