Wick's Angus

16th Annual Production Sale

Saturday, May 1, 2010

At the Ranch
Carpenter, SD
6 p.m.

Selling 56 Registered and Purebred Angus Bulls

To Our Fellow Cattle Producers:

Welcome to our 16th annual production sale. We sincerely thank all of our customers for the business and support you have given us over the years.

It has been an interesting and busy year, to say the least. Since our last sale, we have made some big changes. The day after our 2009 sale, we completely cleaned out the old sale barn. The following day, movers came and moved the barn to our north hay lot. We raised it to 14' sidewalls, and now use it for machinery and feed storage. By early June we had dirt work done and a new Morton building put up. When the rains came and we could not work in the fields, we were working on the new shop/sale barn. Other than the building itself and the cement for the shop floor, we did all the work ourselves, with the help of family and friends.

We feel you will like the line-up of bulls we are offering this year. Our mother cows did an excellent job of raising their calves last year. We use no creep feed, so the weaning weights, from first calf heifers to 12-year-old cows, are attributable to genetics and mother's milk. We weaned calves September 16. Once the calves were started, we put them on a 125-day test to get a true picture of how they would perform over an extended period of time. With the tough winter we have had, we are very impressed with the gains our bulls have made. We averaged a 3.56 lb. gain in the 125-day test. All ADGs listed for the bulls in this sale book are their gains during the 125-day test.

We are offering a wide variety of bloodlines in this year's bulls. There is a good mix of bloodlines we have used in the past, as well as new sires to give our past customers new outcross bloodlines to work with. We have a good selection of heifer bulls. If we recommend them as heifer bulls, we feel confident they are true calving-ease bulls. We also have a good selection of growth bulls. We emphasize maternal on all sires we use, so the replacement heifers out of these bulls should make great mama cows!

I'm sure most of you have heard of Arthrogyrosis Multiplex (AM), commonly referred to as Curly Calf Syndrome, (see related article in the back of this sale book) and Neuropathic Hydrocephalus (NH). A fact sheet on NH is available on the web at www.angus.org/pub/nh/nhinfo.aspx. These are both genetic defects that have been traced back to a certain bloodline in the Angus breed. As have most breeders, we have used semen from offspring of this bloodline in recent years. We have tested any bulls in our sale that are potential carriers of AM or NH. We have had a couple bulls test as carriers and have banded them and removed them from the sale. We feel that as seedstock producers, it is our responsibility to make sure the bulls and heifers we sell are as problem-free as possible and to eliminate the carrying on of the defective genes.

We hope you can make it to our sale and help us break in the new facility, which does include a restroom. Join us for supper, the sale and for a social and entertainment afterwards. If you want to see the bulls at any time, let us know; we would be happy to show them to you.

Scott and Sharon Wicks

Kathryn Wicks

Kirby and Erika Wicks

**New
Sale Facility**

PLEASE BRING THIS SALE BOOK ALONG WITH YOU ON SALE DAY

General Information

AUCTIONEER: Mike Bergh

SALE DAY PHONES:

605-352-7333 605-350-6236
605-350-0092 605-350-5031

CATTLE VIEWING:

Bulls will be available for viewing beginning at 2 p.m. the afternoon of the sale. If you wish to look the bulls over prior to sale day, give us a call and we will be happy to arrange a time for you to do so. If you are unable to attend, arrangements can be made to bid via the phone or by prior notification upon which a representative can bid for you. Lot numbers will correspond with ear tags.

DINNER:

A complimentary beef dinner will be served at the ranch by the Carpenter United Methodist Women on sale day beginning at 5 p.m. A customer appreciation social will follow the sale.

HERD HEALTH:

We have used all our own replacement heifers for ten years. All bulls selling tested negative for BVD Persistent Infection and are from cows tested negative for Johnes. All bulls selling that are potential AM or NH carriers are tested AMF and/or NHF. We raise our bulls on a high roughage diet, rather than pushing them so hard their feet will suffer. Health papers will be provided for any out-of-state buyers. Bulls will be semen tested prior to sale day. Bulls will be vaccinated for pinkeye, foot rot, and Stay Bred and will be given an anthrax shot. They will be poured and double fly-tagged, so they are pasture ready when delivered.

SALE TERMS & CONDITIONS:

Sale terms are cash, with settlement due at the close of the auction. All cattle will sell according to the Terms and Conditions of the American Angus Association. Announcements made sale day take precedence over printed material, prior advertisements and information in this sale book.

VOLUME DISCOUNTS:

Discounts apply to any bull sold for \$2,000 or more as follows: If two bulls are purchased--2% discount on bulls sold for \$2,000 or more; if three or more bulls are purchased--3% discount on bulls sold for \$2,000 or more.

DELIVERY:

We offer free delivery of bulls to buyers in South Dakota or within 300 miles. There will be a charge of \$1 per loaded mile after 300 miles. Bulls become the property of the buyer immediately after the sale. We encourage you to insure your bulls against loss.

LIABILITY:

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The owners and sale staff assume no liability for property loss or accidents that may occur.

GUARANTEE:

If injury occurs or a disposition problem develops with your bull in the first 90 days after turnout, let us know and we will come get the bull. We have held back bulls for reserve, so if you have a bull go bad, there will be a good chance we can replace him to get you by for the breeding season. If the problem with your bull is not correctable, we will offer credit toward the purchase of a replacement bull at our next sale. All claims notification of bulls sold sale day should be made as soon as possible, but no later than December 31 of the same year purchase. This guarantee is based on our getting the bull back, so we can monitor whether the problem is permanent or temporary. If permanent, we wish to have the bull back so we can add pounds before selling, and full credit will be given to you.

RETAINED INTEREST:

Wicks Angus is retaining a one-third semen interest in every registered bull in this sale. **You will have full possession and 100% salvage value of the bull.** We are retaining the right to one-third of the semen sales revenue from the bull if semen sales become a future possibility.

REGISTRATION TRANSFER:

All transfers of registrations will be paid by seller if request is made within 30 days of the sale. After that, buyer is responsible for transfer costs.

DIRECTIONS:

From Carpenter: 3½ miles north on 415th Ave. and 1¼ mile east on 186th St.
From Clark: 9 mi. west to 415th Ave. (Carpenter Hwy.), 13½ mi. south to 186th St., and 1¼ mile east.
From Doland: 9 mi. east to 415th Ave. (Carpenter Hwy.), 13½ mi. south to 186th St., and 1¼ mile east.
(Watch for the red and white beef sign on the corner when turning east to our farm.)

Again, we thank you for attending our sale. Feel free to contact us at any time if you have any questions regarding the bulls or the sale. Our phone number is (605) 352-9802 (home) or (605) 350-0092 (cell). Our address is 41639 186th St., Carpenter, SD 57322, and E-mail address is sawangus@yahoo.com.

Visit the *Angus Journal*® Web site, www.angusjournal.com, and view this sale book online.

ADG 3.98.

Dam's fifth calf.

Extra K205 is a new sire for us. We are really happy with his sons. This bull's mother was injured early last summer, so he couldn't perform to his full potential prior to weaning, but with an almost 4 lb. gain, he definitely made up for it when he got on his own.

ADG 3.88.
 Dam's seventh calf.
 Borderline heifer bull. Out of one of our older cows, this bull brings strong maternal traits. His dam still has a near perfect udder and is a very correct looking cow.

ADG 3.0.
 Dam's seventh calf.
 This is a very solid In Focus son. He only has a 1+1.2 Birth EPD, but with a 92 lb. actual birth weight, I can't recommend him for heifers. He would work great on second calvers and older cows. He has great maternal traits in his background.

ADG 4.14.
 Dam's second calf.
 Out of a second calver, this is a very stout bull. He had the second highest ADG of all the bulls. Add that to a 14.0 RE and 4.13 IMF, he'll make great steers.

ADG 3.28.
 Dam's fourth calf.
 Out of a bull we bought at Bush Angus. A very thick bull with a \$B value of +41.92. He is one of the youngest in the sale, but he performed right with the rest of them.

Purebred Unregistered Bulls

Answers to your questions

Arthrogryposis Multiplex (AM)

Producers who use Angus genetics can be assured that they are buying the best product available. Advanced technology and rapid DNA-testing has made more information available than ever before.

Arthrogryposis Multiplex (AM), commonly referred to as Curly Calf Syndrome is a lethal genetic defect with a simple recessive pattern of inheritance.

Commercial cattlemen should be aware of AM, and the genetics that trace back to AM so that proper breeding decisions can be made, but there is no need for undue concern.

Definitions

AM carrier (AMC) Any animal that has been tested and carries the recessive AM mutation in its DNA

AM non-carrier (AMF) Any animal that has been tested and determined to be free of the AM mutation

AM affected (AMA) A stillborn calf with a spine that is bent or twisted, that appears small and thin and has legs that are often rigid and may be hyper-extended

Angus producers are continually testing their herds, and a list of those results are posted to the American Angus Association Web site, www.angus.org.

Since AM is a simple recessive inherited defect, only a single pair of genes controls the condition, much like red vs. black coat color in the Angus breed.

Animals can be carriers (AMC) and when they are mated with other carriers (AMC), have a 25% chance of producing an AMA calf. However, when two carriers are mated, there is also a 25% chance that a non-carrier (AMF) live calf will be born and a 50% chance of producing a live normal-appearing carrier (AMC).

It is important to know whether an animal is AMC or AMF when making your breeding decisions. Carriers appear normal. The only way to tell if an animal is an AM carrier is to have a DNA-based test performed by an authorized lab (listed on Association Web site).

If you have bloodlines in your herd that you know trace back to carriers, you will want to select and purchase a bull that has been tested AMF to ensure that AM does not affect your operation. Irrespective of its pedigree, an animal that has been tested and found to be AMF did not inherit the mutation and will not carry or transmit this genetic defect to its progeny. If a cow has an AMA calf, it means that the cow is an AM carrier, and that the sire she was bred to also carries the AM mutation.

AMC x AMC =

- ¼ normal-appearing non-carrier (AMF)
- ½ normal-appearing carrier (AMC)
- ¼ (AMA)

If a carrier (AMC) is mated to a non-carrier (AMF), then all of the progeny will be normal appearing, but half of them will be carriers (AMC).

AMC x AMF =

- ½ normal-appearing non-carrier (AMF)
- ½ normal-appearing carrier (AMC)

If you do have cows in your herd that trace back to bloodlines that have known AM genetics, the goal would be to use bulls without AM genetics in their pedigree or tested free (AMF) bulls. If you breed your AM influenced cows to unrelated or tested-AMF bulls, you eliminate risk of having an AMA calf. Females that are tested AMF, and bred to AMF bull will never produce AMC or AMA calves.

Be sure to ask your seedstock supplier about the status of the bulls or females he or she is selling, and buy your next Angus genetics with confidence!
